Diskeeper[®] 2008

Maximizing Performance and Reliability—*Automatically*[™]

Give your system foot-to-the-floor performance with new Diskeeper 2008!

Diskeeper 2008 races forward into the future with the ONLY truly automatic software of any kind. Through the use of new InvisiTasking technology, Diskeeper 2008 is designed to maintain continuous peak disk performance completely invisibly—in real time—without affecting system resources or intruding on system demands.

“If you want increased disk performance and speed, install Diskeeper on all your systems.”

John lasiuolo

Computer Outlook Radio Show

Moving beyond the concept of “Set It and Forget It,”[®] Diskeeper 2008 represents a quantum leap in system performance and reliability. Simply install the software; Diskeeper takes care of the rest. With Diskeeper 2008 deployed your systems will run faster—period.

Experience the future of automatic system performance and reliability—get Diskeeper 2008 now!

- ▶ **Breakthrough Technology! InvisiTasking**—InvisiTasking is the foundation for Diskeeper to eliminate fragmentation in real time without affecting system resources or intruding on system demands.
- ▶ **Exclusive! Real-time defragmentation** automatically handles fragmentation as it occurs, providing maximum system performance at all times!
- ▶ **NEW! Complete file and free space defragmentation in the most extreme of conditions**—even if your systems have only one or two percent of free space left available or a file in millions of fragments, Diskeeper 2008 can restore lost performance and save the applications reliant on those files from major reliability failures.
- ▶ **NEW! “Defragmentation Intelligence” enhancements**—Diskeeper’s logic controller, which detects various volume and system conditions and chooses the most effective algorithm, has been re-designed to deliver performance benefits faster and more efficiently.
- ▶ **NEW! Frag Shield[™] 2.0**—boosts reliability and availability by automatically preventing crash-inducing fragmentation of critical system files.
- ▶ **NEW! Volume Shadow Copy Service (VSS) Compatibility mode**—only Diskeeper 2008’s new VSS-compatible mode affords you the ability to leverage the data protection of VSS and the performance and reliability of automatic defragmentation.
- ▶ **NEW! Disk Performance Analyzer for Networks[™] (DPAN)**—the agent-less performance analysis technology gets a full update and tight integration within Diskeeper 2008 Administrator Edition. Now you can get real-time performance metrics (on machines not running Diskeeper) with high-level visual graphs and detailed fragmentation data on-demand or emailed automatically.

Automatically get maximum performance and reliability from every PC, laptop and server at your site

With the release of Diskeeper 2008, a new era has begun in the way IT Professionals will maintain their systems for optimum performance. For the first time ever, you can regain and maintain a blazingly fast level of performance on PCs, laptops and servers, and for the entire life of the system.

Diskeeper 2008 with InvisiTasking eliminates problems IN REAL TIME as they occur, without the need for scheduling and without EVER interfering with valuable system resources. Whether it's the largest corporate network or a small business, Diskeeper 2008 sets an entirely new standard in performance and reliability.

With Diskeeper 2008 there is never a need for scheduling or administrator supervision—just install and the software automatically takes care of the rest. It's really that simple. Get it now and your systems will never be the same again!

“We use Diskeeper on all file/print servers and have noticed a drastic performance improvement...the only way to efficiently manage 1TB of active files is with Diskeeper.”

Lonnie Snyder, Systems Administrator
Association of American Medical Colleges MCSE

- ▶ **Breakthrough Technology! InvisiTasking**—InvisiTasking is the foundation for Diskeeper to eliminate fragmentation in real time without affecting system resources or intruding on system demands.

Now you can get real-time performance metrics (on machines not running Diskeeper) with high-level visual graphs and detailed fragmentation data on-demand or emailed automatically.
- ▶ **I-FAAST 2.0** (Intelligent File Access Acceleration Sequencing Technology) automatically boosts access speeds for the most commonly used files.
- ▶ **Terabyte Volume Engine 2.0**—Powerful defragmentation for high capacity and high traffic servers with disk volumes containing hundreds of thousands to millions of files (e.g. NAS, RAID, and SAN). Also allows unobtrusive and thorough free space consolidation on busy 24/7 servers.
- ▶ **Automatic online directory consolidation** boosts antivirus scans and back-up speed.
- ▶ **Native 64 bit** operating system support.
- ▶ **Boot-Time Mode** safely performs Microsoft®-recommended defragmentation of critical system files.
- ▶ **Power Management for Laptops** prolongs battery life by suspending background defragmentation while on battery power.

Maximizing Performance and Reliability—Automatically

Easy-to-use interface shows how much speed and performance is gained by automatic defragmentation with Diskeeper.

Diskeeper 2008 editions:

Diskeeper 2008 Professional saves costs and reduces help desk traffic by automatically enhancing the performance of desktops, laptops and workstations.

Diskeeper 2008 Pro Premier provides advanced defragmentation technology to meet the needs of high-end workstations and power users.

Diskeeper 2008 Server is streamlined from the ground up to focus on fast and efficient defragmentation of standard and Advanced Windows® Server operating systems.

Diskeeper 2008 EnterpriseServer provides fast defragmentation for high-capacity, high-traffic servers with disk volumes containing millions of files and multiple terabytes in size. Maintains peak performance and reliability of mission-critical, 24/7 servers.

Diskeeper 2008 Administrator provides complete centralized management of Diskeeper 2008 across your entire network.

Diskeeper 2008 HomeServer provides Diskeeper's fully automated performance and reliability solutions for Windows Home Server computers.
